

With this carrier you can chamfer edges and different shaped machinings with the tool supported on a level surface of the workpiece.

Its excellent spindle stability means you can carry out uniform chamfers and controlled values in all directions (X-Z).

i The Contouring carrier can be used directly on flexible couplings of KOPAL Turbo Classic and Turbo Tronic motors. The «Contouring head» set can be mounted on all Azimut carriers

Motor and contouring carrier supplied separately

Precise and uniform chamfers
Simple adjustment - no tools necessary
Chamfering of holes of Ø 10 minimum
Chamfering of complex inner and outer shapes

CONTOURING CARRIER

Components	Ref.
Complete carrier	AZ-070
45° carbide cutter	AZ-660

Adjustment

Turn the support ring to change the chamfer value

Chamfers :
0 - 2 mm

Locking screw

CONTOURING CARRIER

(with quick coupling handle)

To be used with Turbo flexible transmissions refs. AZ-006 and AZ-003

- 1 Contouring head Ref. : AZ-080 (cutter, bearings, guide plate, adjustment elements)
- 2 Ø 25 mm bearing (2 rolling bearings) Ref. : AZ-202
- 3 Attachment ring Ref. : AZ-736
- 4 Drive Ref. : AZ-305
- 5 Quick coupling handle Ref. : AZ-310
